CAUTIONARY STATEMENT

FORWARD LOOKING STATEMENTS
This presentation includes “forward looking statements” within the meaning of the federal securities laws relating to management’s current expectations or plans for the Company’s future operating and financial performance. Such forward looking statements may include, among other things, statements relating to future sales, earnings, cash flow, results of operations, uses of cash, share repurchases, tax payments and rates, research and development spending, cost savings, other measures of financial performance, potential future plans, strategies or transactions, credit ratings and net indebtedness, other anticipated benefits resulting from the Company’s planned acquisition (the “Transaction”) of the Aircraft Wheel & Brake Division of Parker Hannifin-Corporation (“Parker”), the Transaction, including the benefits of the Transaction, the anticipated timing of the Transaction, and the expected performance and future operations of Kaman, and can be identified by the use of words such as “will,” “expect,” “poise,” “believe,” “plans,” “strategy,” “prospects,” “estimate,” “seek,” “target,” “anticipate,” “intend,” “future,” “likely,” “may,” “should,” “would,” “could,” “project,” “opportunity,” “will be,” “will continue,” “will likely result,” and other words of similar meaning in connection with a discussion of the Transaction or future operating or financial performance or events. These statements are based on assumptions currently believed to be valid but involve significant risks and uncertainties, many of which are beyond our control, which could cause our actual results to differ materially from those expressed in the forward looking statements. Such risks and uncertainties include, among others, (i) the ability of the parties to satisfy the conditions precedent and consummate the Transaction; (ii) the risk that audited financial statements for the acquired business may not be available to be prepared in a timely manner or at all; (iii) the risk that all required approvals under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and other applicable competition and foreign investment laws will not be received in a timely manner or at all; (iv) Kaman’s ability to arrange financing to complete the Transaction; (v) the risk that the consummation of the Transaction will not be completed in a timely manner or at all (including as a result of the European Commission not requiring Parker to divest the acquired business as a condition to its approval of the Meggitt acquisition or such acquisition not otherwise closing), which may result in Kaman incurring significant costs and expenses and otherwise adversely affect the price of Kaman’s securities; (vi) the possibility that the Transaction will result in adjustments to the capped call arrangements Kaman entered into in connection with its convertible senior unsecured notes due May 2024 that will have a negative impact to Kaman and its current stockholders; (vii) the effect of the announcement or pendency of the Transaction on the business relationships and operating results of Kaman and the acquired business generally; (viii) the outcome of any legal proceedings that may be instituted against Kaman or Parker related to the purchase agreement or the Transaction; (ix) following consummation of the Transaction, Kaman’s ability to enforce and protect intellectual property related to the acquired business; (x) risks that the Transaction disrupts the current plans and operations of Kaman or the acquired business; (xi) the representations and warranties provided by Parker and Kaman’s rights to recourse are extremely limited in the purchase agreement and, as a result, the assumptions on which its estimates of future results of the acquired business have been based may prove to be incorrect in a number of material ways, which could result in an inability to realize the expected benefits of the Transaction or exposure to material liabilities; (xii) the inability of Kaman to successfully integrate the operations of the acquired business and realize anticipated benefits of the Transaction; (xiii) the inability of Kaman or the acquired business to profitably attract new customers and retain existing customers; (xiv) the ability to implement the anticipated business plans following closing and achieve anticipated benefits and savings; and (xv) future and estimated revenues, earnings, cash flow, charges and expenditures. The foregoing list of factors is not exhaustive. Additional risks and uncertainties that could cause our actual results to differ materially from those expressed in the forward looking statements are identified in our reports filed with the Securities and Exchange Commission, including our Annual Reports on Form 10-K, our Quarterly Reports on Form 10-Q and our Current Reports on Form 8-K. The forward looking statements included in this report and any exhibits filed or furnished herewith are made only as of the date of this release. Readers are cautioned not to put undue reliance on forward looking statements, and Kaman does not undertake any obligation to update the forward looking statements to reflect subsequent events or circumstances.

NON-GAAP FINANCIAL MEASURES
Management believes that the Non-GAAP financial measures (i.e. financial measures that are not computed in accordance with Generally Accepted Accounting Principles) used in this presentation or in other disclosures provide important perspectives into the Company’s ongoing business performance. The Company does not intend for the information to be considered in isolation or as a substitute for the related GAAP measures. Other companies may define the measures differently. Reconciliations from GAAP measures to the Non-GAAP measures are presented at the end of the presentation.
Note: Data as of December 31, 2021
OUR VISION
To propel our customers forward by imagining and delivering highly-engineered solutions
2021 FINANCIAL RESULTS

- **$709 M** NET SALES
- **$49 M** CASH FLOW FROM OPERATING ACTIVITIES
- **33%** GROSS MARGIN
- **$56 M** ADJUSTED FREE CASH FLOW

**Earnings from continuing operations** $44 M
**Adjusted EBITDA** $95 M
**Adjusted EBITDA margin** 13.5%
**Diluted EPS** $1.57
**Adjusted diluted EPS** $1.93
CONSISTENT PERFORMANCE
DIVERSE PORTFOLIO POISED TO CAPTURE REBOUNDING COMMERCIAL AEROSPACE

PORTFOLIO TRANSFORMATION

2019 - Peak commercial aerospace volumes
2020 - Acquired Bal Seal
   - Record JPF deliveries
   - Pandemic impacts
2021 - Divested U.K. composites business
   - Implemented operations excellence model
   - Segmented our portfolio
   - Strong year end backlog in Engineered Products
2022 - Announced definitive agreement to acquire Parker-Hannifin Aircraft Wheel & Brake
   - Invested in Near Earth Autonomy
   - Improving outlook for commercial aerospace
SEGMENT OUTLOOK & STRATEGY

OUTLOOK

- GROWING
  - Grow organically and through M&A
  - Win new business
  - Improve new product introduction
  - Benefit from rebounding commercial aviation market

MISSION

- TRANSFORMING
  - Pivot to new technologies and markets
  - Develop new products
  - Advance autonomous technologies
  - Launch next generation fuzing systems

STRATEGY

- IMPROVING
  - Strengthen margin
  - Win higher margin programs
  - Improve quality and on-time delivery
  - Drive operations excellence
KEY MESSAGES

INNOVATION & GROWTH

• Announced definitive agreement to purchase Parker-Hannifin Aircraft Wheel & Brake – May 23, 2022
• Accelerating investment in autonomous technology through equity investment in Near Earth Autonomy
• Investing in automation across our Engineered Products segment
• Increasing research and development in new products and markets
• On target for demonstration of the full scale KARGO UAV unmanned aerial system in 2H 2022

DRIVERS FOR 2022 PERFORMANCE

• Strong medical and industrial demand
• Rebounding commercial, business and general aviation markets
• Backlog increase in Engineered Products with a 33% increase in 1H22
• Quarterly cadence impacted by JPF sales timing
FOCUSED ON TOP QUARTILE PERFORMANCE

GROWTH THROUGH INNOVATION
Accelerate internal investments in our products, facilities and people

M&A AND CAPITAL ALLOCATION
Expand capabilities through accretive M&A
Maintain a disciplined approach to shareholder returns

OPERATIONAL EXCELLENCE
Drive significantly improved operating and financial performance

EBITDA MARGIN
FREE CASH FLOW CONVERSION
RETURN ON INVESTED CAPITAL
PARKER AIRCRAFT WHEEL & BRAKE ACQUISITION

MEETS KAMAN VALUE CREATION CRITERIA

- Expands our highly engineered product portfolio
- Business with a technical leadership position
- Increased exposure on aerospace & defense platforms
- Attractive financial profile with strong margins and cash flows
- Accretive investment
- Significant increase in high-margin aftermarket
LEADING PORTFOLIO

- Trusted provider of mission critical wheel & brake technology products

ESTABLISHED & PREDICTABLE BUSINESS

- Best in class margins and strong cash flow
- Long standing customer relationships with global reach
- Solutions integrated into 100+ platforms worldwide
- Installed base of ~450,000 aircraft globally serviced
- Scalability for short-term and long-term growth
- Customized propriety designs protected by intellectual property
- Experienced leadership team

Note: All data including but not limited to Revenue and EBITDA Margin is LTM December 31, 2021 as provided by Parker and has not been audited. See full presentation for acquisition published on May 23, 2022 at www.kaman.com/investors/investor-presentations.

---

(1) Unaudited financial information provided by Parker, rounded to the nearest whole number. There are no adjustments for Parker for EBITDA margin.

(2) Combined business calculated as sum of Kaman FY 2021 results and Aircraft Wheel & Brake LTM December 31, 2021.
FOCUSED ON INNOVATION

EXPANSION OPPORTUNITY INTO MEDICAL DEVICES FOR VASCULAR CIRCULATION

Kaman is developing a solution for high RPM seals in pumps that provide a minimally invasive option for blood circulation

- Working with customer to certify product
- Targeting commercial launch 2024-2025
FOCUSED ON INNOVATION

HIGH PRECISION MINIATURE BEARINGS FOR TURBO MOLECULAR PUMPS

SOLUTION FOR APPLICATIONS WITH:
- High vacuum
- High vibration
- Limited thermal dissipation
- Low drive power

USED IN HIGH-TECH, ULTRA-CLEAN MARKETS:
- Semiconductors
- Solar Panels
- Laboratory Equipment
- Surface Coatings
FOCUSED ON INNOVATION

TDH™ - TITANIUM DIFFUSION HARDENING

Hardens titanium to a greater depth than alternative processes, providing exceptional wear resistance characteristics and improved durability against abrasion and friction.

**KEY ATTRIBUTES:**
- High strength/weight ratio
- Performs well at high temperatures
- Corrosion resistant
- High hardness level
- Low wear & friction

**SOLUTIONS FOR:**
- Rotor/Helicopter bearings
- Fixed wing bearings
- Marine bearings
- Rocket bearings
- Oil/Gas/Chemical valves
- Suppressors
- Medical devices/implantables
ADVANCING AUTONOMOUS FLIGHT

INVESTMENT IN NEAR EARTH AUTONOMY:
Accelerating technology to establish an industry standard in autonomous solutions for the next generation of aviation.

Source: Compound annual growth rate estimate provided by Morgan Stanley and Research and Markets.
FOCUSED ON INNOVATION

*KARGO UAV*, unmanned aerial system, a purpose built autonomous medium lift logistics vehicle for a wide range of defense and commercial applications

- Designed for easy transport and deployment
- Lifting capacity of 800 lbs
- Self-deploys with no payload up to 523 nautical miles
- Flight testing of scaled model - Completed 3Q21
- Flight testing of full-scale vehicle - 2022
FUTURE COMMERICAL AIRCRAFT APPLICATIONS

- OFFSHORE SUPPORT
- HUMANITARIAN AID & DISASTER RELIEF
- URBAN DELIVERY
OUR SEGMENTS

ENGINEERED PRODUCTS

Provides sophisticated, proprietary bearings and components; super precision, miniature ball bearings; and proprietary spring energized seals, springs and contacts.

PRECISION PRODUCTS

Provides precision safe and arming solutions for missile and bomb systems for the U.S. and allied militaries; subcontract helicopter work; manufacture, restoration, modification and support of our helicopter programs including K-MAX®, SH-2G and KARGO UAV unmanned aerial system.

STRUCTURES

Provides sophisticated complex metallic and composite aerostructures for commercial, military and general aviation fixed and rotary wing aircraft, and medical imaging solutions.

CASH FROM OPERATING ACTIVITIES
DISCIPLINED APPROACH TO M&A

OUR STRENGTHS

• Product innovation
• Engineering and manufacturing expertise
• Helping customers solve complex problems

AREAS OF INTEREST

• Businesses with a technical leadership position
• Exposure to high-growth end markets
• Attractive financial profile with strong margins and cash flows
• Markets and technologies we know well

VALUE CRITERIA

• High return investment
• Meaningful synergy opportunities
• Long term leverage target of 2x-3x
NON-GAAP RECONCILIATIONS

For Kaman:

Adjusted EBITDA and Adjusted EBITDA Margin - Adjusted EBITDA for the consolidated company results is defined as earnings from continuing operations before interest, taxes, other expense (income), net, depreciation and amortization and certain items that are not indicative of the operating performance of the Company for the periods presented. Adjusted EBITDA for the segments is defined as operating income before depreciation and amortization. Adjusted EBITDA margin is defined as Adjusted EBITDA as a percent of Net sales. Management believes Adjusted EBITDA and Adjusted EBITDA margin provide an additional perspective on the operating results of the organization and its earnings capacity and helps improve the comparability of our results between periods because they provide a view of our operations that excludes items that management believes are not reflective of operating performance, such as items traditionally removed from net earnings in the calculation of EBITDA as well as Other expense (income), net and certain items that are not indicative of the operating performance of the Company for the period presented. Adjusted EBITDA and Adjusted EBITDA margin are not presented as an alternative measure of operating performance, as determined in accordance with GAAP.

Adjusted Earnings from Continuing Operations and Adjusted Diluted Earnings Per Share - Adjusted earnings from continuing operations and adjusted diluted earnings per share are defined as GAAP “Earnings from continuing operations” and “Diluted earnings per share”, less items that are not indicative of the operating performance of the business for the periods presented. These items are included in the reconciliation below. Management uses adjusted earnings from continuing operations and adjusted diluted earnings per share to evaluate performance period over period, to analyze the underlying trends in our business and to assess its performance relative to its competitors. We believe that this information is useful for investors and financial institutions seeking to analyze and compare companies on the basis of operating performance.

Adjusted Free Cash Flow – Adjusted free cash flow is defined as GAAP “Net cash provided by (used in) operating activities from continuing operations” in a period less “Expenditures for property, plant & equipment” in the same period and any adjustments that are representative of the Company’s cash generation or usage in the period. For 2021 we adjusted free cash flow to remove the cash payment made to Bal Seal employees under the retention plan established by the former owners of Bal Seal. Management believes free cash flow from continuing operations and adjusted free cash flow provides an important perspective on our ability to generate cash from our business operations and, as such, that it is an important financial measure for use in evaluating the Company’s financial performance. Free cash flow and adjusted free cash flow should not be viewed as representing the residual cash flow available for discretionary expenditures such as dividends to shareholders or acquisitions, as it may exclude certain mandatory expenditures such as repayment of maturing debt and other contractual obligations. Management uses free cash flow and Adjusted free cash flow internally to assess overall liquidity.

For Parker:

EBITDA and EBITDA Margin – EBITDA and EBITDA margin for Aircraft Wheel and Brake represent unaudited financial information provided by Parker. EBITDA is defined as earnings before interest, taxes, net depreciation. EBITDA margin is defined as EBITDA as a percent of Net sale. EBITDA and EBITDA Margin are indicative of the operating performance of the Company for the periods presented. Management believes EBITDA and EBITDA margin provide an additional perspective on the operating results of the organization and its earnings capacity and helps improve the comparability of results between because they provide a view of operations that excludes items that management believes are not reflective of operating performance. EBITDA and EBITDA margin are not presented as an alternative measure of operating performance, as determined in accordance with GAAP.
